LETTER OF RECOMMENDATION

I feel privileged to recommend my student **Mr. S. Aswath**, who has been associated with this college for four years pursuing his Bachelor's degree in Automobile Engineering. I have known him since 2019 and as his professor have taught him "Automotive Electronics" and "Automotive Embedded Systems" courses. As the pandemic conditions were becoming normal, he actively gained practical knowledge by reaching out the Electronics Lab of our department.

I, as an Assistant Professor, was the Head of the Electronics Lab and observed his technical detail-oriented approach on completing a task which was assigned to him. I was very impressed with his abilities and assigned him on products such as Spoilt Fruit Detector and Coconut Counter, in which he worked on software-based tasks. He actively participated and achieved fourth place in "Disenyo PCB Challenge 2021" contest which was organised by Indian Printed Circuit Association. He also took part in "KPIT Sparkle Competition 2021" under the topic "Intelligent Safety Car Door Locking System" which was conducted by KPIT Technologies and qualified to Prototype Phase under my guidance. He has also lectured a class on a Printed Circuit Board design tool "KICAD" to his fellow classmates.

I was his final year project guide and was impressed with the way he approached each and every obstacle which was faced by him. The project titled "Zone Based ECU Concept using CAN Protocol" was presented to the BOSCH officials who were very impressed with the ideology and the work he has done.

With my observation, I feel that Aswath is a student who is an enthusiastic learner and a team player who is keen to improve himself and help others who face issues in solving problems. Hence, I strongly recommend my student as a potential candidate to your esteemed University for admission and wish him the very best in all his future endeavours.

Mr. A. Prabhakaran,
Asst. Professor - Dept. of Automobile Engineering
